

Our focus

Prepped in 3-4 weeks

By solemnly focussing on the core and relevant subjects for practice, the Datacademy is able to prepare your employees for practice in just 3-4 weeks.

From theory to practice

The best way to learn is to apply your newly gained knowledge directly. This not only helps to remember the theory, but also learns how to work with it in a practical sense.

No prior knowledge needed

As all content is text-based with visualizations, everyone can go through the content at their own pace. The modules are developed with no prior knowledge in mind.

Ready for your first project!

Through the significant focus on applicability in practice you will be ready to start your first data project as soon as you graduate our Datacademy!
